

Path-Track

Messaging and AVL Software

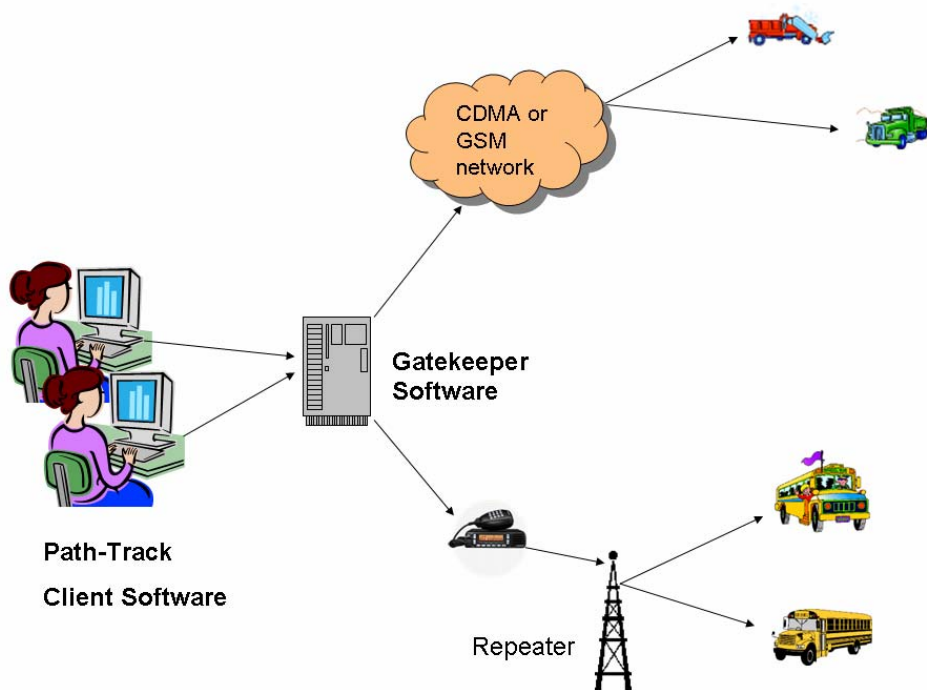

The **Path-Track** application is designed to operate with **WiPath** MDT terminals, providing a comprehensive Messaging and AVL software solution.

NeoTerra software solutions are designed with the end user in mind. Clear, colour co-ordinated screens with intuitive 'workflow' designed layouts allow users to operate the solutions with a minimum of computer knowledge and training.

The range of **NeoTerra** products have the same 'look and feel'. This allows a migration path without costly and time consuming conversion.

Archive reports for **Path-Track** is based on Crystal Reports. Reports can be generated and then printed or exported into a range of standard file formats. This allows easy 'super user' access to the data via MS Access or Excel for advanced reporting or analysis.
